

CARBO SMOKEHOUSES SOLVE ALL TASKS

COUNTRY RESIDENCE - RESTAURANT - INDUSTRY - CATERING

REAL FIRE, REAL WOOD, REAL SMOKE

SMOKERS

CARBO SMOKEHOUSES

1. CARBO smokehouses have been specially designed both for the preparation of products for industrial purposes, restaurants, cafes and for personal use in a country house.
2. Each CARBO smokehouse is made manually and works on reverse flow (with the exception of vertical models - Vert), which ensures that the temperature is the same in all smoking chambers.
3. The smokehouses are made of thick-walled steel from 3mm to 10 mm, which saves wood when used during frosts and makes the smokehouses highly durable.
4. All smokehouses are certified. Carbo is an official trademark "TM".
5. CARBO smokehouses work on wood and coal, which provides a full-cycle hot smoking typical for the southern states of America.
